

EcoDark® Granule Technology

Vibrant Granule Reflectivity

Bringing new meaning to the phrase "pitch black," EcoDark® granules allow for even darker shades, maintaining indoor temperatures without overworking your HVAC system.

EcoDark® Granule Technology

The Challenge:

You want a highly reflective roof that meets the prescriptive requirements of Title 24, but you don't want to settle for the typical pastels or pale imitations of traditional colors like barkwood and weathered wood. Thankfully, our innovative granule

technology unlocks better choices. GAF EcoDark® granules produce vibrant, dark colors never before seen on a cool roof. You can meet those requirements with the rich colors you've always wanted in a highly reflective shingle, including Charcoal.

Benefits:

- California Cool® shingles can be used to comply with the Cool Roof Requirements for steep-slope residential buildings of 2022 Title 24, Part 6, of the California Code of Regulations
- Some California Cool® shingles can be used to comply with the Green Building Standards Code of Los Angeles County
- Cool roofs may help you save on cooling costs[‡]

California Cool® Shingles Product Information

Shingle line	Shingle color	Initial reflectivity	Initial emissivity	Aged reflectivity	Aged SRI	CRRC product ID#
Timberline HDZ® RS	Sagewood	0.22	0.92	0.21 [†]	21	0676-0132b
	Sandalwood	0.23	0.92	0.22 [†]	22	0676-0133b
	Aged Chestnut	0.21	0.92	0.21 [†]	21	0676-0130b
